

360 Cyber Protection

What are the issues?

- Safeguarding customer's personal information is now a legal and regulatory requirement (GDPR)
- Cyber attacks target personal and financial information
- Data is shared extensively across multiple devices – amplifying risk of data breach
- Ransomware (which prevents access to systems) is on the rise and recovery is expensive
- Tennis & Sports Clubs have an additional duty of care towards children & young people
- A successful cyber intrusion will:
 - heavily impact your ability to function,
 - damage your reputation
 - have a significant financial penalty
 - risk putting you out of business

360 Cyber Protection is the solution

Deploy 360 Cyber Protection – our Managed Cyber Security Service

- Detect & Prevent cyber breaches
- 24X7 monitoring - networks & devices
- Block malicious websites & those with obscene materials
- Achieve UK Gov backed Cyber Essentials Certification

Protect your
leisure business
from Cyber
Attack

360 Cyber Protection

Case Study

Like your business, Halton Tennis Centre holds significant amounts of personally identifiable information on a wide range of customers, members and staff. Nick Leighton (CEO) and his board recognised this and took the risk of a cyber intrusion seriously. A successful attack could have very damaging and expensive consequences for the club and its customers. Furthermore, protecting information relating to the many children and young people who use the club is an important aspect of the centre's safeguarding policy. That's why, the management team at Halton decided to deploy the 360 Cyber Protection service.

"If you run a gym, lesiure centre, recreational facility or tennis club, you need to be aware of the dangers of cyber attack. We are so pleased we employed 360 Cyber Protection to look after our very precious data. Our clients are our priority and keeping their data safe is paramount"

Nick Leighton, Halton UK
